WORK EXPERIENCE

Full-Stack Developer *Jan 2023 – Present*
Atelier d'Art Heednadesign, Montreal, QC

- Developed and maintained a web platform using Java, JavaScript, HTML, CSS, Node.js, and SQL to support dynamic content and user interactions.
- Built and integrated backend functionality, database operations, and custom features while contributing to the site's overall design and structure.
- Improved usability and responsiveness across devices for a smooth user experience.

Pharmacy Laboratory Technician *Apr 2026 – Present*
Jean Coutu Pharmacy, Montreal, QC

- Verified medication dosages and patient files with accuracy and confidentiality.
- Assisted customers at cash, answering questions and processing transactions.
- Supported pharmacists by preparing and organizing prescriptions for pickup.

PROJECTS

Smart Course Companion Website | Available on GitHub *2026*
Java, JavaScript, HTML, CSS, SQL, Node.js

- Collaborated with a team to design and build a responsive database-driven website that helps students track courses, assignments, and deadlines.
- Implemented features like course/grade management and profile personalization.
- Focused on clean UI, making it easy to navigate and practical to use.

Java SmartTravel Management System *2025*
Java

- Built a Java application to manage clients, trips, transportation, and accommodations in one system
- Implemented file saving/loading, input validation, and custom exception handling
- Focused on clean, organized code using object-oriented programming principles
